CHANDAN L

+91 8317335589 | chandanlokesh17@gmail.com | LinkedIn | GitHub | Bengaluru, India

OBJECTIVE

Motivated fresher aspiring to become a Security Engineer with foundational knowledge in penetration testing, vulnerability assessment, and cloud. Eager to learn and apply hands-on skills to identify and mitigate security risks. Committed to contributing effectively to the security and protection of organizational systems.

SKILLS

Programming	:	Python, Java, C, JavaScript, HTML, CSS, SQL
Cloud Security (AWS)	:	S3, VPC, IAM, CloudWatch, Lambda, RDS, EC2
Cyber Security	:	Enumeration, Vulnerability Assessment, Exploitation, Web Security Testing, Networking , Active Directory, Log Analysis, SIME
Security Tools	:	Linux, Git, Nmap, Nessus, Burp Suite, Metasploit, John the Ripper, SQLMap, FFUF, Splunk, Wireshark, open VAS, Elastic Stack, Kibana, Beat, Logstash

EDUCATION

Master of Computer Applications (MCA)
Sir M. Visvesvaraya Institute of Technology, Bengaluru | SGPA: 9.6
Bachelor of Science (EMCs)
Government Science College, Hassan | CGPA: 6.9

EXPERIENCE

GIR Technologies | Cybersecurity Intern (Dec 2024 – May 2025)

Location: Hyderabad

- Contributed to a research project on **Network Intrusion Detection** using **VAE** and **WGAN**, where I helped generate synthetic traffic data for model training.
- Learned and applied **Wireshark** to analyze real-time network traffic patterns for anomaly detection.
- Assisted the security team with basic **web application penetration testing** on internal websites, and supported clients in using **security tools**.

IntrnFort | Cloud Development Trainee (Online Internship) (July 2024 - Sept 2024)

Location: Bengaluru

- Completed a structured cloud development course with hands-on projects focused on **AWS services** like S3, EC2, VPC, IAM, Lambda, RDS.
- Designed a three-tier web architecture and deployed cloud components to simulate scalable, secure environments.

RankBook | Cybersecurity Project Mentor **(Jan 2024 - Mar 2024)**
Location: Hassan

- Mentored students in **Python programming for cybersecurity**, guiding them in building tools like **port scanners**, **password managers**, and **simple keyloggers**.
- Delivered hands-on training in **penetration testing concepts**, including network scanning, enumeration, and vulnerability assessment.

PROJECT

Cyber-Alerter-Automated Vulnerability Monitoring System

- Developed a web-based application to **monitor vulnerabilities** by **scraping OEM websites**, sending **real-time alerts**, and **predicting risk levels**.
- Integrated **Node.js**, **Express.js**, **MongoDB** for the backend, **Python** for web scraping & email alerts, and **REST APIs** for real-time updates and used **React.js** for the frontend.

XSS Scanner - Web Vulnerability Detection Tool

- Developed an **automated XSS scanner** using **Puppeteer** to detect vulnerabilities by injecting payloads into web applications. Built with **Node.js, Express.js, MongoDB** for the backend and **HTML, CSS, JavaScript** for the frontend.

Network Intrusion Detection using VAE and WGAN

- Developed a deep learning-based intrusion detection system using **Variational Autoencoder (VAE)** and **Wasserstein GANs (WGAN)**
- preprocessed network traffic data with **Pandas**, **MinMaxScaler**, and used **TensorFlow** and **trained** with adoptive loos functions to enhance **anomaly detection**

CERTIFICATION

Certified Defensive Security Analyst (CDSA) | HACKTHEBOX (In-Progress)
Complete Ethical Hacking Bootcamp | Udemy
Ethical Hacking | VTU MOOC

ACHIEVEMENTS

- **Smart India Hackathon Finalist** – **Top 5** nationally among **500+ teams**; secured **top positions** in multiple **hackathons.**
- **CTF Competitions** – **Runner-up** in **Capture The Flag (CTF)** cybersecurity contests, demonstrating **problem-solving and technical skills**.
- **Leadership & Coordination** – **Hackathon Team Lead** with proven experience in leading under pressure; served as **MCA Dept. Representative** and **Core Tech Fest Coordinator**, showcasing **organizational and leadership abilities**.
